

Microsoft Azure Portal Exploration Report

Name: Joshua Akiotu

Course: Cloud Computing

Assignment: Azure Governance and Resource Organization

Objective

The objective of this assignment was to become familiar with the Microsoft Azure Portal, understand Azure governance, create a Resource Group, and explore Azure Identity and Access Management (IAM) and Cost Management services.

Azure Subscription

I successfully accessed the Azure Portal and identified my active Azure subscription. The subscription serves as the billing and management boundary for Azure resources.

Resource Group

A Resource Group named RG-Joshua-Lab was created. Resource Groups provide a logical container for organizing and managing related Azure resources.

Azure Region

The Resource Group was deployed in a selected Azure region.

Identity and Access Management

Azure IAM uses Role-Based Access Control (RBAC) to assign permissions securely.

Cost Management

Azure Cost Management + Billing allows monitoring usage, budgets and forecasts.

What I Learned

I learned how Azure subscriptions, Resource Groups, IAM and Cost Management work together.

Conclusion

This exercise improved my understanding of Microsoft Azure cloud management.
